Open Standards / Healthy Country Planning

Planning and adaptive management for protected areas

Registrations are open for a five-day Open Standards / Healthy Country Planning workshop in the stunning Tasmanian Wilderness World Heritage Area. Using a well-proven adult learning approach, this intensive live-in course will give people a good understanding of how these tools can be directly used in their own work.

WHO

The course is delivered under the [Protected Areas Learning and Research Collaboration](#) jointly by the University of Tasmania, Conservation Management and the Tasmanian Land Conservancy.

WHERE

The five day intensive live-in training course is at Bronte Park, Tasmania, adjacent to the TLC's Five Rivers Reserve, 2.5 hrs bus drive from Hobart.

WHEN

Monday 30th Jan - Friday 3rd Feb 2017
(if sufficient enrolments) .

COST

\$2,200 (inc GST) including all food, accommodation, transport and materials

COURSE CONTENT

Introduce the concepts, steps and structures of the [Open Standards for the Practice of Conservation](#) by using the Tasmanian Land Conservancy's magnificent [Five Rivers Reserve](#) as a case study to directly demonstrate its application.

Students will work in small teams to pursue specific threads through the entire adaptive planning and management loop and learn how to integrate these threads into a powerful, ongoing planning and management framework.

OUTCOME

The knowledge gained is readily implemented and applicable for use in a diverse range of protected areas, including those managed by governments, non-government organisations, private landholders and Indigenous communities.

The approach is also applicable to conservation projects and property planning and management at any scale. It is increasingly used by government and non-government agencies across diverse jurisdictions and geographies.

WANT TO LEARN MORE?

You can build on this training by enrolling in either the [Graduate Certificate of Protected Area Planning](#) or the [Master of Protected Area Governance and Management](#). These two courses are offered by the University of Tasmania – you can study them by distance mode or on-campus in Hobart.

One of the units in these courses, KGA531 Protected Area Management Plans, includes this five day intensive, for which you can be given credit.

To inquire about these courses, email Michael.Lockwood@utas.edu.au
